

# Pronto!

The Portable & Secure Client for Unified Communications and Media Delivery

## What is Pronto!?

Pronto! is a flash framework that delivers a Unified Communications experience to end users in a single dashboard. Pronto! is extremely powerful, yet it is lightweight and faster than any fat client. It also delivers more multimedia punch than any web client on the market.

Pronto! is based on Adobe Flash®, Adobe Flex™ 3 and and Adobe AIR technologies, bringing together Rich Media and Unified Communications for web 2.0 delivery of powerful applications. Pronto! unifies all forms of Internet Communications - from e-mail and IM, to chat, rich media, groupware and VoIP - in a sleek, easy-to-use, easy-to-manage client interface; on or off deck.

Pronto! delivers powerful call control and calendaring features, including "click to call" and shared calendar management. Pronto! promotes team collaboration and increases employee productivity by unlocking e-mail and other productivity tools from the desktop. Whether users are in their office, at home, or on the road, they can access their e-mail, IM, telephony, or files with the click of a mouse. Pronto! also brings VoIP to Flash® with the integrated floating module phone.

Pronto! is flexible and extensible with a modular mashup framework providing the capability to add or remove application modules, as easy as 1-2-3. Modules for Pronto! can power professional HD Media for IPTV applications, content like ring tones, static content such as photos, or mash-ups to web services for powerful integration user-needs in the Web 2.0 world.

## MAIN FEATURES

### Security

- Core to the design of Pronto! is security. Pronto! runs as a binary in memory space, not using the browser cache

### Speed and Size

- Pronto! is less than 2 megs in size, and uses the CommuniGate Pro XIMSS (XML Interface for Messaging, Scheduling, and Signalling) API. Pronto! uses lightweight XML requests to the server dramatically increasing performance with no middle-ware or heavy protocols

### Media Integration

- The design and extensibility of Pronto! allows powerful Mashups with external sources of Media and Content such as the Adobe Flash Media Server™
- HD quality Video (H.264) and Audio AAC3
- Snap in Media and Entertainment Modules

### Portability

- Works with any OSX, Windows, Linux or Solaris browser using Flash 9 or higher

### Fluid and Dynamic Feel

- Intuitive, elegant, and sleek design with advanced collaboration features
- Drag & drop features with no page refreshing

### Adobe AIR Version Additional Features

- Higher performance HTML rendering
- Multi-Session windows not restricted to a browser
- Advanced Drag & Drop from outside the application

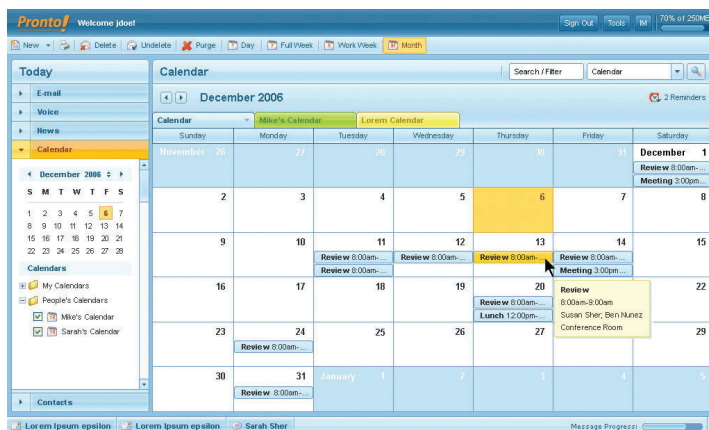

Pronto! scales to support any deployment size, and it is more than flexible in meeting the requirements of business or consumer subscribers.

In carrier deployments Pronto! can be customized to the service provider needs to drive brand and differentiate service offerings.

Pronto! delivers all your Unified Communications in one secure and fast client. Experience Web 2.0 with messaging, calendaring, IM/presence and the integrated VoIP phone – any place, any time – with a single identity and a single client.

Pronto! is available with CommuniGate Pro Ver5.1 and above.

- Ignite Unified Communications
- SaaS solution for the SME market
- Powerful Value Added Services
- Multi-Tenant Architecture
